

Climate Change Connection:

Connecting Manitobans to climate change
facts and solutions

Climate Change

Boot Camp II

Become a community climate change champion! Learn how to organize a climate change event and deliver a climate change presentation. Join us for a day-long training session to learn about climate change and how to get your community motivated and taking action. Hear about the current facts, science, evidence, impacts, and solutions.

Training sessions begin in **late October** and are **FREE OF CHARGE**. Trainees will receive hands-on training from local experts. Each participant will receive a "Tool Kit" containing a handbook, hand-outs for their audiences, power-point presentations, and all other material necessary to make their own presentations.

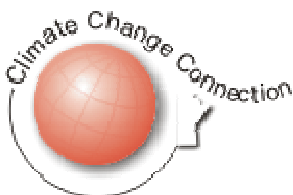

Each trainee will be asked to commit to spreading the word, either through organizing a community event or providing presentations.

If you wish to apply, please send a message of interest by **October 3rd** to

climate.connection@mts.net
