Host a Youth Conference on Climate Change

The details:

A Youth Conference on Climate Change is a day-long event designed specifically for your school to empower your students into taking action on climate change.

It is successful! We have been hosting Youth Conferences on Climate Change across Manitoba since 2005. We have seen the result... school eco-groups forming, numerous climate-friendly school projects occurring, individuals pursuing careers in climatology and environmental science, and students now in the workforce making a difference.

It's easy. Fill out an application form and send it to us. We will help you do the rest.
